Chapter 67: Divine Triad's Troops over 100 Years Time

Over a span of 100 years, the Divine Triad's ultimate troops will continue to reproduce and expand exponentially, given their ability to naturally reproduce and, in some cases, now have female counterparts for previously infertile groups. Here’s an estimated summary of the growth in numbers for each group:

Troop Growth Over 100 Years

1. Apostles of God

Current Number: 1 million

Reproduction Rate: Low, as they are divine and highly specialized. Assuming a steady reproduction rate, their numbers might grow modestly by 20% over 100 years.

Estimated Growth: ~1.2 million

Total After 100 Years: 1.2 million

2. Dark Apostles

Current Number: Billions

Reproduction Rate: Natural reproduction, with families forming and growing. Given their numbers and natural reproductive rate, their population could grow by 50% to 100% over 100 years.

Estimated Growth: ~10-20 billion (assuming a 50% to 100% increase)

Total After 100 Years: 10-20 billion

3. Heavenly Soldiers

Current Number: Trillions

Reproduction Rate: Enhanced by the World Tree, with alliances through marriage and natural reproduction. Their numbers could grow exponentially, potentially increasing by 200% to 500% over 100 years.

Estimated Growth: ~6-12 trillion (assuming a 200%-500% increase)

Total After 100 Years: 6-12 trillion

4. Shadowkins

Current Number: Billions

Reproduction Rate: Natural reproduction, thriving independently. Assuming a moderate to high reproduction rate, their population could grow by 50% to 100% over 100 years.

Estimated Growth: ~5-10 billion

Total After 100 Years: 5-10 billion

5. Dragonkins

Current Number: Billions

Reproduction Rate: Naturally reproducing, with strong communities. They could experience a 50% to 100% growth over 100 years.

Estimated Growth: ~5-10 billion

Total After 100 Years: 5-10 billion

6. Shadow Lords

Current Number: Tens of billions (including spouses)

Reproduction Rate: Newly able to reproduce, their numbers would likely grow rapidly, possibly by 100% to 200% over 100 years.

Estimated Growth: ~20-40 billion (assuming 100%-200% increase)

Total After 100 Years: 20-40 billion

7. Fiery Dragon Lords

Current Number: Millions

Reproduction Rate: Newly able to reproduce, their population would likely experience a 100% to 200% increase over 100 years.

Estimated Growth: ~2-4 million

Total After 100 Years: 2-4 million

Summary of Growth After 100 Years

Apostles of God: 1.2 million

Dark Apostles: 10-20 billion

Heavenly Soldiers: 6-12 trillion

Shadowkins: 5-10 billion

Dragonkins: 5-10 billion

Shadow Lords: 20-40 billion

Fiery Dragon Lords: 2-4 million

Total Strength After 100 Years

By the end of 100 years, the total numbers of the Divine Triad’s troops would likely be in the trillions across multiple groups, potentially reaching 13-30 trillion or more, depending on their reproductive rates and alliances. This immense strength ensures that the Divine Triad’s army will remain an overwhelmingly powerful force in the multiverse, capable of sustaining its dominance for eternity.
